

# Vocabulary List

## From the “Special Features” Video

---

**Angle** – The direction in which an object is held.

**Bell on a jellyfish** – The top part of the jellyfish that looks like a see-through umbrella that allows them to move through the water.

**Brilliantly** – Very bright.

**Color-changing ink** – Ink that looks like it changes color when you tilt it different ways.

**Copper** – A reddish brown color, like the color of a penny.

**Creatures** – Animals.

**Currency** – Something that has value that can be exchanged for goods or services. Sometimes people use the word “money” instead.

**Distinctive** – Clearly marking a thing as different from others.

**Features** – Parts or characteristics that are noticeable.

**Raised** – Lifted up.

**Rough** – Bumpy or uneven.

**Texture** – How something feels.

**Thread** – A thin fine line.

**Unique** – Special.

**UV Light** – UV stands for ultraviolet. This light can't be seen by the human eye, but when used can cause certain things to glow or become visible.

**Watermark** – A mark or picture placed into paper when it is being made that can only be seen if the paper is held up to light.

**3-D Ribbon** – A strip that has pictures on it, and when tilted the pictures look like they change and move.
